Senior Software Engineer with 5+ years of experience specializing in full-stack development, microservices architecture, and cloud-native solutions. Expert in building scalable React/Node.js applications and leading technical teams within Agile/Scrum environments to deliver high-impact software.

EXPERIENCE

Tech Innovations Inc

March 2021 - Present

Senior Software Engineer

San Francisco, CA

- Architected and developed scalable microservices and web applications using TypeScript, JavaScript, and Python, ensuring high availability and performance across cloud platforms.
- Led a cross-functional team of 3 developers in an Agile/Scrum environment, mentoring junior engineers and overseeing the full software development life cycle (SDLC).
- Optimized complex PostgreSQL and MongoDB queries and schema designs, improving application response times by 30% and enhancing overall data integrity.
- Partnered with product managers and stakeholders to translate business requirements into technical specifications, utilizing advanced debugging and problem-solving skills to maintain 99.9% uptime.

StartupXYZ

June 2019 - February 2021

Full Stack Developer

Remote

- Engineered robust RESTful APIs and GraphQL endpoints using Node.js and Express, facilitating seamless data exchange between client-side and server-side components.
- Developed responsive, user-centric frontend interfaces with React, implementing modern UI/UX patterns and ensuring cross-browser compatibility.
- Established comprehensive CI/CD pipelines and automated testing suites using Jest and GitHub Actions, significantly reducing deployment errors and manual QA time.
- Deployed and managed containerized applications on AWS cloud infrastructure using Docker and Kubernetes, leveraging serverless architectures (AWS Lambda) for cost-efficient scaling.
